1. AIRLINE RESERVATION SYSTEM

Aim

To design and develop an Airline Reservation System using Zoho Creator that enables passengers to book flights, manage reservation details, and maintain booking records efficiently.

Procedure

- Log in to Zoho Creator.
- Create a new application named Airline Reservation System.
- Create a form and add the required fields such as Passenger Name, Email, Phone Number, Source, Destination, Flight Number, Travel Date, Departure Time, Travel Class, Number of Passengers, Seat Number, Total Fare, Payment Method, and Booking Status.
- Configure dropdown fields with appropriate options (Travel Class, Payment Method, Booking Status, etc.).
- Create reports to display the submitted reservation records.
- Add workflows (optional) to automate calculations such as total fare based on travel class and number of passengers.
- Save and publish the application.
- Test the application by entering sample booking details and verify that the records are stored correctly.

Implementation

The Airline Reservation System was implemented in Zoho Creator using low-code development. A reservation form was created to capture passenger and flight information. Reports were generated to display all booking records. Dropdown menus were used to minimize data entry errors, and workflows were configured to automate calculations such as total fare. The application allows users to submit reservations, while administrators can easily view and manage booking information through reports.

The screenshot displays the 'airline reservation system' form. On the left is a dark sidebar with navigation options: 'airline reservation system' (selected), 'airline reservation system Report', 'property buying and rental process', and 'Car booking System'. The main form area contains the following fields:

Field Label	Value
Passenger Name	Sana Fathima
Email	sanafathimam1082.sse@saveetha.com
Phone	+91 8825927791
From	Dubai
To	chennai
Flight number	12763
Travel Date	30-Jul-2026
departure Time	08:32:25
class	Premium economy
Number of Passenger	2
Seat Number	101

The bottom of the sidebar shows the user profile 'sana fathima'.

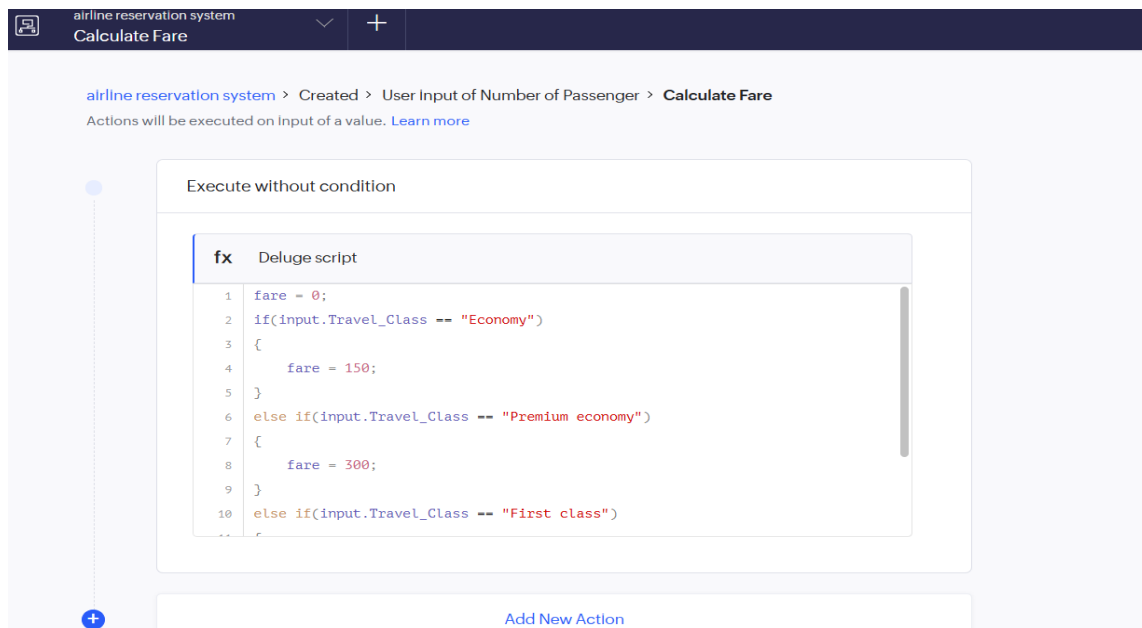

FIGURE 2: WORKFLOW

The screenshot shows the 'airline reservation system Report' in Zoho Creator. The left sidebar contains a menu with options: 'airline reservation system', 'airline reservation system', 'airline reservation system Report' (highlighted), 'property buying and rental process', and 'Car booking System'. The main area displays a table with the following data:

Reservation ID	Passenger Name	Email	Phone	From	To	Flight number
1002	Shafi R	shafi@gmail.com	+919791836850	Jeddah	chennai	3909
1001	sameeha M	sameeha@gmail.com	+917397670427	mumbai	california	234
1000	Sana Fathima	sanafathimam1082.sse@saveetha.com	+918825927791	Dubai	chennai	12763

Result

The Airline Reservation System was successfully developed using Zoho Creator. The application allows users to enter flight reservation details, stores the information securely, generates booking reports, and supports workflow automation, providing a simple and efficient flight booking management system.
