Experiment 3: Car Booking Reservation System

Aim

To design and develop a Car Booking Reservation System using Zoho Creator that enables customers to reserve cars, manage booking details, calculate the total rental amount based on distance and toll charges, and maintain reservation records efficiently.

Procedure

- Log in to Zoho Creator.
- Create a new application named Car Booking Reservation System.
- Create a form and add fields such as Reservation ID, Customer Name, Email, Phone Number, Car Type, Pickup Location, Drop Location, Distance (km), Toll Charge, Total Rent Amount, Payment Method, and Booking Status.
- Configure the dropdown fields with appropriate values for Car Type, Pickup Location, Payment Method, and Booking Status.
- Create a workflow to automatically calculate the total rent amount using the selected car type, travel distance, and toll charge.
- Create a report to display all reservation details.
- Save and publish the application.
- Test the application by entering sample reservation details and verify that the total rent amount is calculated correctly.

Implementation

The Car Booking Reservation System was implemented using Zoho Creator's low-code platform. A reservation form was created to collect customer and travel details. Dropdown fields were used to simplify data entry and reduce errors. A workflow was developed to automatically calculate the rental amount based on the selected car type, travel distance, and toll charges. Reports were generated to display and manage all reservation records efficiently.

The screenshot displays the 'car booking reservation' form within the Zoho Creator interface. The left sidebar shows the application name 'car booking reservation' and a menu with options like 'car booking reservation' and 'car booking reservation Report'. The main form area contains the following fields:

Field Label	Value
Name	Sana M
Phone	+91 8825927791
Email	sanafathimam1082.sse@saveetha.com
Car brand	tata
car type	Sedan
Car Model	Nexon
pickup date	30-Jul-2026
return date	04-Aug-2026
pickup location	airport
Number of days	4
Total rent amount	2,400.00

Result

The Car Booking Reservation System was successfully developed using Zoho Creator. The application allows customers to reserve cars, stores reservation details securely, automatically calculates the total rental amount based on distance and toll charges, and generates reports for efficient reservation management.
