

Experiment4: Library Book Reservation System for SIMATS Library using Zoho Creator (SaaS)

Aim

To develop a cloud-based Library Book Reservation System for the SIMATS Library using Zoho Creator (Software as a Service - SaaS). The application enables students to reserve books online, manage reservation details, and allows library staff to maintain reservation records efficiently.

Procedure

1. Log in to Zoho Creator.
2. Create a new application named SIMATS Library Book Reservation System.
3. Create a form and add fields such as Student Name, Register Number, Department, Book ID, Book Title, Author Name, Reservation Date, Issue Date, Due Date, Book Availability, Reservation Status, Email, and Phone Number.
4. Configure dropdown fields with appropriate values for Department, Book Availability, and Reservation Status.
5. Create reports to display all library reservation records.
6. Add a workflow to automatically calculate the Due Date (14 days from the Issue Date).
7. Save and publish the application.
8. Test the application by entering sample reservation details and verify that the due date is calculated automatically.

Implementation

The SIMATS Library Book Reservation System was implemented using Zoho Creator, a cloud-based SaaS platform. A reservation form was designed to collect student and book information. Reports were created to display and manage reservation records. A workflow was implemented to automatically calculate the due date based on the issue date, reducing manual effort and improving accuracy. Since the application is hosted in the cloud, students and library staff can access it securely through a web browser from any location.

The screenshot displays the 'Library Book Reservation System' web application. On the left is a dark blue sidebar with the 'LBR' logo and a menu containing three items, all labeled 'Library Book Reservation System'. The main content area is white and titled 'Library Book Reservation System'. It contains a form with the following fields: 'Reservation ID' (2342156), 'Name' (Sana M, with sub-labels 'First Name' and 'Last Name'), 'Email' (sanafathimam1082.sse@saveetha.com), 'Phone' (+91 8825927791), 'Register Number' (192371082), 'Department' (CSE), 'Book ID' (234567), 'Book Category' (Cloud Computing), 'Book Title' (visualization), 'Book Availability' (available), and 'Reservation Date' (01-Aug-2026). At the bottom left of the sidebar, a user profile for 'sana fathima' is visible.

Field	Value
Reservation ID	2342156
Name	Sana M
Email	sanafathimam1082.sse@saveetha.com
Phone	+91 8825927791
Register Number	192371082
Department	CSE
Book ID	234567
Book Category	Cloud Computing
Book Title	visualization
Book Availability	available
Reservation Date	01-Aug-2026

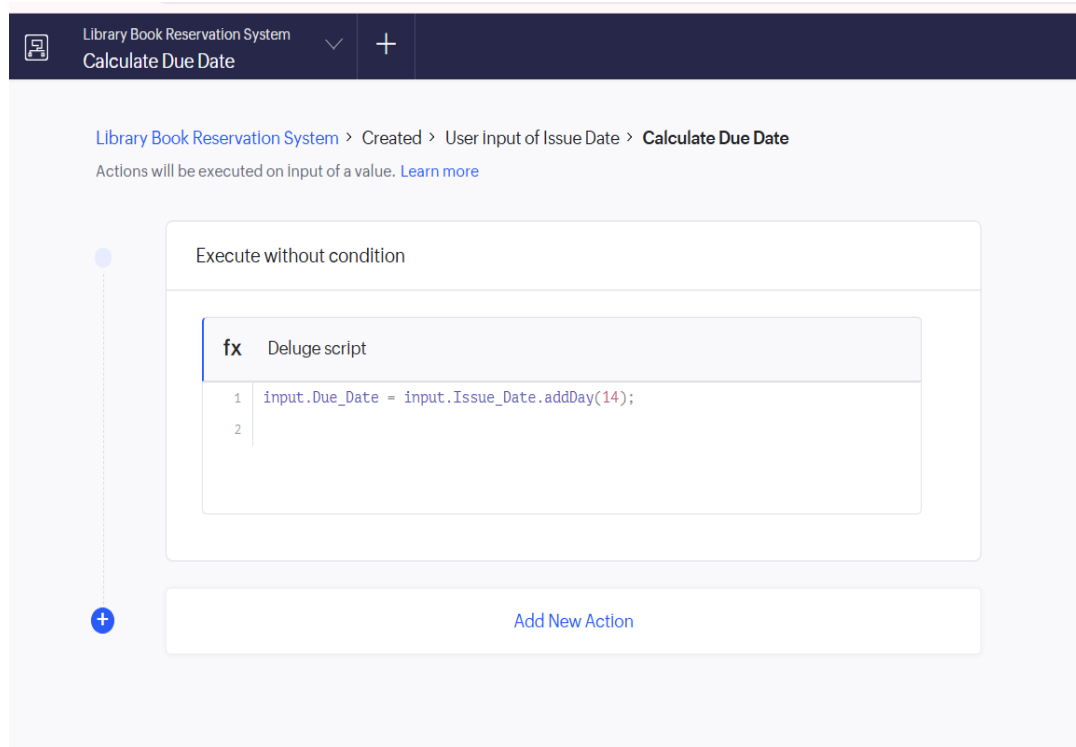

FIGURE 2: WORKFLOW

The screenshot shows the Zoho Creator report for the 'Library Book Reservation System'. The report is titled 'Library Book Reservation System Report'. It displays a table with the following columns: Name, Email, Phone, Auto Number, Register Number, Department, and Book ID. The table contains two rows of data.

Name	Email	Phone	Auto Number	Register Number	Department	Book ID
Sana M	sanafathimam1082.sse@saveetha.com	+918825927791	2	192371082	IT	2367890
Sana M	sanafathimam1082.sse@saveetha.com	+918825927791	1	192371082	CSE	234567

Result

The SIMATS Library Book Reservation System was successfully developed using Zoho Creator (SaaS). The application allows student to reserve books online, stores reservation details securely, automatically calculates the due date, and provides reports for efficient library management. This demonstrates the implementation of a cloud-based Software as a Service (SaaS) application
