

## **Experiment: Product Selling System using Zoho Creator (SaaS)**

### **Aim**

To develop a cloud-based Product Selling System using Zoho Creator (Software as a Service - SaaS) that enables customers to browse products, place orders, and manage product sales efficiently through a cloud application.

### **Procedure**

1. Log in to Zoho Creator.
2. Create a new application named Product Selling System.
3. Create a form and add fields such as Customer Name, Email, Phone Number, Product Name, Product Category, Quantity, Price per Unit, Total Amount, Payment Method, Delivery Address, and Order Status.
4. Configure dropdown fields with suitable values.
5. Create reports to display customer orders and product sales.
6. Add a workflow to automatically calculate the Total Amount based on the product price and quantity.
7. Save and publish the application.
8. Test the application by placing a sample order and verify that the total amount is calculated automatically.

### **Implementation**

The Product Selling System was implemented using Zoho Creator, a cloud-based Software as a Service (SaaS) platform. A form was created to collect customer and product order details. Reports were generated to display all orders. A

workflow was implemented to automatically calculate the total order amount using the product price and quantity. Since the application is hosted on the cloud, users can access it from any device with an internet connection, while administrators can efficiently manage orders and sales records.

The screenshot displays the 'Product Selling System' (PSS) interface. On the left is a dark sidebar with the PSS logo and navigation links: 'Product Selling System' (selected), 'Product Selling System Report', and 'Product Selling System'. The main content area is titled 'Product Selling System' and contains a form with the following fields:

- Name:** First Name: 'sana', Last Name: 'M'
- Email:** 'sanafathimam1082.sse@saveetha.com'
- Phone:** '+91 8825927791' (with a dropdown for country code)
- Product Name:** 'Laptop' (with a dropdown menu)
- Quantity:** '#####' (with a dropdown menu)
- Product Category:** 'electronics' (with a dropdown menu)
- Price:** '2,00,000'
- Total Amount:** '1220000' (highlighted with a blue border)
- Payment Method:** 'UPI' (with a dropdown menu)
- Delivery Status:** 'delivered'

The bottom of the sidebar shows a user profile for 'sana fathima' with a profile icon and a notification bell.

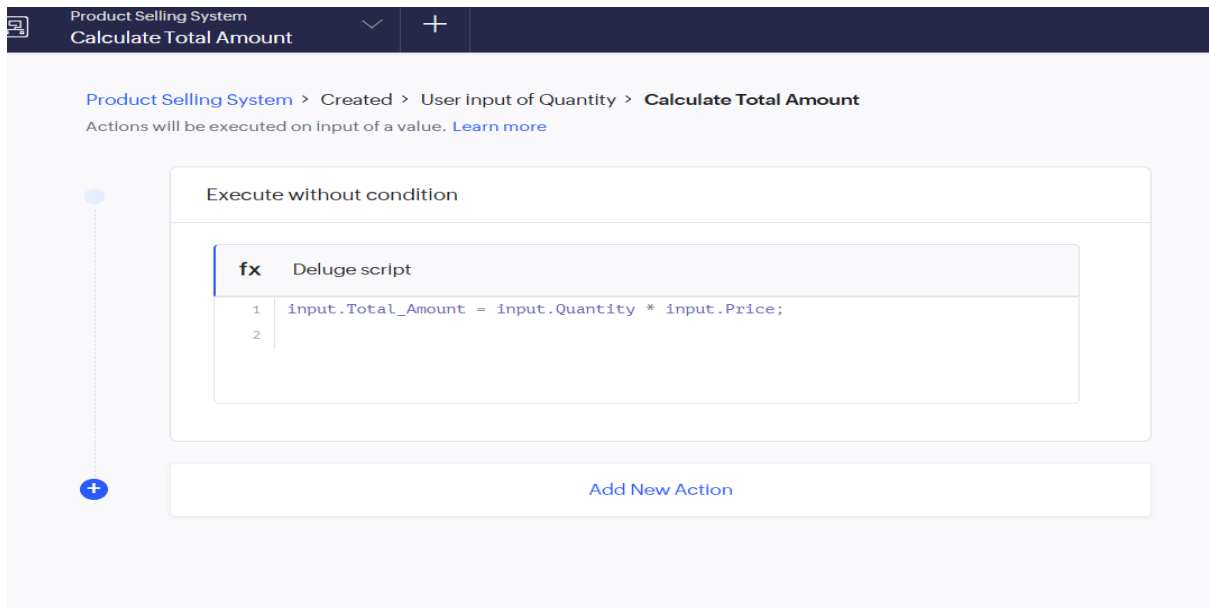

FIGURE 2: WORKFLOW

The screenshot shows the 'Product Selling System Report' in Zoho Creator. The report is a table with the following columns: Order ID, Name, Email, Phone, Product Name, Product Category, and Price. The data shown is as follows:

| Order ID | Name   | Email                             | Phone         | Product Name | Product Category | Price         |
|----------|--------|-----------------------------------|---------------|--------------|------------------|---------------|
| 1        | sana M | sanafathimam1082.sse@saveetha.com | +918825927791 | Laptop       | electronics      | ₹ 2,00,000.00 |

## Result

The Product Selling System was successfully developed using Zoho Creator (SaaS). The application enables customers to place product orders online, automatically calculates the total amount, stores order details securely, and generates reports for efficient sales management. This demonstrates the implementation of a cloud-based Software as a Service (SaaS) application.
